

**BENEFITS**

**Broad Coverage**

Scans Web applications, databases and networks from both inside and outside the firewall to find exposures other products miss.

**More Accurate**

Deeper, more intelligent scanning to eliminate false positives.

**Higher Productivity**

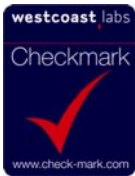

Streamlined remediation guidance and reporting to reduce resolution time.

**Improved Compliance**

Integrated policy and regulatory reporting to ensure organizations remain compliant with industry and regulatory policies.

**PERRY ELLIS**

"We have been impressed with NeXpose and the scanning results because it provides greater detail on the vulnerabilities we find as well as how to fix them. Its reporting capabilities are superior."

**ACCURATE THREAT DETECTION – ACTIONABLE INSIGHTS – BROAD COVERAGE**

**ACROSS YOUR ENTIRE NETWORK**

The escalating sophistication of intruder attacks using vulnerabilities found in networks and applications, including web applications, has made it essential for organizations to regularly assess network security. NeXpose Unified Vulnerability Management comprehensively scans Web applications, databases, operating systems and networks to locate threats, assess their risk and propose a streamlined remediation plan to optimize security and compliance. NeXpose discovers vulnerabilities that hackers frequently exploit and other products fail to detect by using an expert system to leverage vulnerabilities found in one area to uncover potentially hidden vulnerabilities in deeper levels of the systems.

**Unified Vulnerability Management**

**NETWORKS**

The first step in securing your IT environment is to ensure all systems and network devices have been properly audited and exposures eliminated. NeXpose offers a vulnerability management solution that enables organizations to audit their networks, track discovered vulnerabilities through resolution and ensure policy compliance.

**WEB APPLICATIONS**

Because they exist as a conduit between external users and a company's internal databases, Web applications can be one of the biggest IT security risks. NeXpose scans the Web application server and all Web applications for serious threats to your environment such as SQL injection and cross-site scripting.

**DATABASES**

NeXpose provides comprehensive database scanning for vulnerabilities such as buffer overflows, denial of service, default accounts or default permissions on database objects such as tables, views, and stored procedures.

**PROFESSIONAL SERVICES**

- PCI Compliance Testing
- Penetration Testing
- Best Practices Consulting
- Web Application Assessment
- NeXpose Training
- IT Security Training

**CITY OF PHILADELPHIA**

"NeXpose not only provides system protection, but is instrumental in redirecting our resources to streamline the infrastructure of the IT department. Thanks to NeXpose, we have a better picture of our entire network. We can easily run scans on a daily basis. Identifying our risks allows us to prioritize and use our resources in best way possible."

**CARNEGIE MELLON UNIVERSITY - HOME OF CERT**

"Rapid7's ability to listen and work with us was a differentiator. The company brings not only an understanding of our organization and a commitment to network security, but with the integration of NeXpose with our environment, we will now possess a world-class vulnerability detection system."

**RAPID7 NEXPOSE DELIVERS IN ONE UNIFIED PRODUCT:**

- **Vulnerability management** - scans your environment from both inside and outside the firewall.
- **Risk assessment** – identifies risk based upon how a vulnerability in one system affects another.
- **Policy and compliance reporting** - determines if your systems comply with corporate and regulatory policies.
- **Remediation guidance** – provides detailed information on how to fix vulnerabilities quickly and easily.
- **Accurate scan results with no false positives** - delivers accurate scanning results in less time using an expert system that follows an assessment process similar to that used by hackers.

SC MAGAZINE RATING	
Features	*****
Ease of use	*****
Performance	*****

Value for money	*****
<b>OVERALL RATING</b>	<b>*****</b>
<b>Strengths</b> Vulnerability assessment and risk analysis in one box.	
<b>Weaknesses</b> None that we found.	
<b>Verdict</b> A solid product that I have recommended to my university. It also is our SC Magazine Recommended product this month.	

**RAPID7 PROFESSIONAL SERVICES**

Rapid7 has extensive expertise in security and risk management to help organizations achieve its vulnerability management, risk assessment and policy compliance goals. Our services help you define security best practices to ensure your environment is protected from the malicious threats that have affected the IT infrastructure of many major businesses.

**RAPID7 CUSTOMER SUPPORT**

Rapid7 Customer Support services provide rapid resolution of issues. Support includes telephone and email support, 24 hour vulnerability service level agreement, 24 hour incident response time and a reliable testing guarantee. Our team of highly skilled and responsive experts in network security understands the criticality of your issues and is available to help.

*SC Magazine's 2008 "Recommended Product" for Vulnerability Assessment*

**About Rapid 7**

Rapid7 is a leader in vulnerability management and compliance, delivering a single unified solution across an organization's entire infrastructure. Rapid7 NeXpose is the only solution that includes support for web applications, databases, operating systems, and network devices in a single system. It separates real threats from the noise common to most vulnerability management systems, giving direct, actionable visibility into the real threats to mitigate risk and remain compliant.
