

PROFESSIONAL SERVICES OVERVIEW

Penetration Testing

- Analysis of either external, internal, or both external and internal vulnerabilities with risk scores and a prioritized remediation list
- Testing of operating systems, network devices, services, and software such as databases and web applications
- Penetration Testing Training

Compliance Audits

- Gap analysis in preparation for PCI, HIPAA, GLBA, ISO 27001, NERC/FERC, and SOX compliance audits

Web Application Security Audits

- Audit the effectiveness of Web applications security controls
- Remediation advice to help Web applications withstand attack
- Web Application Security Training

Enterprise Security Best Practices

- Develop a plan identifying risk and tools recommendations to find and fix security issues
- Evaluation of your policies and procedures based on our extensive knowledge of industry best practices

Social Engineering

- Recommendations to help identify and remediate internal and external social weaknesses
- Social engineering security awareness training for employees

Wireless Security Audits

- Identifying security best practices to prevent unauthorized use of your Wireless LAN (802.11)
- Wireless reconnaissance, rogue access point location, penetration testing

Rapid7 NeXpose Consulting & Training

- Installation and deployment expertise tailored to your needs
- Rapid7 NeXpose Jumpstart Installation and Training includes site specific deployment architecture, planning, installation, reporting, and administration

Rapid7 Penetration Testing

Experienced IT professionals understand that periodic penetration testing is essential, whether the intent is to thwart malicious hackers or meet compliance standards. Penetration testing is a method of probing and identifying security vulnerabilities in your network and pinpointing where your IT environment can be exploited by a hacker. Threats can originate both internally and externally and security industry experts recommend performing both internal and external penetration tests. If your business demands PCI compliance, PCI DSS 11.3 dictates performing internal and external penetration testing annually. Remember, knowledge is power and by having a confidential, independent assessment of your IT environment, you can provide a higher level of security protection against inevitable attacks and help prioritize your finite IT resources.

Why Rapid7?

Rapid7 Professional Services is a full-service enterprise security assessment team. At Rapid7, we have purposefully brought together a services organization whose skills and areas of expertise complement each other, ensuring that your consulting engagement will be staffed with an experienced, qualified team. In fact, our consultants have an average of 10 years enterprise security experience across a wide-variety of industries from higher education to the Fortune 100. And, Rapid7 consultants offer indispensable perspective on industry standards, coding practices, malware and attack trends, and a deep knowledge of current known vulnerabilities.

Objectivity and Experience

As you evaluate how best to perform penetration testing you will find many automated scanning tools available. A word of caution, by using the automated scans exclusively you will be getting an incomplete or distorted view of your vulnerabilities. Security specialists can differentiate results, eliminate false positives, and prioritize vulnerabilities based on their experience. This enables your IT staff to optimize their time and address the top security threats. Hackers have the advantage of human intervention, shouldn't your security measures benefit from the same advantage?

ABOUT RAPID7

Rapid7 is a leader in vulnerability management and compliance, delivering a single unified solution across an organization's entire infrastructure. Rapid7 NeXpose is the only solution that includes support for web applications, databases, operating systems, and network devices in a single system. It separates real threats from the noise common to most vulnerability management systems, giving direct, actionable visibility into the real threats to mitigate risk and remain compliant. For more information on NeXpose products and services, visit www.rapid7.com.
