

# RAPID7 INTELLIGENCE HUB: ACTIONABLE INTELLIGENCE FOR PROACTIVE DEFENSE

## The Expanding Threat Landscape Requires a Smarter Approach

The threat landscape is expanding rapidly as both vulnerability volume and attacker sophistication accelerate. In 2025, Common Vulnerabilities and Exposures (CVEs) reached a historic high with more than 48,000 disclosures, a +20% increase from 2024<sup>(1)</sup>. At the same time, ransomware groups are evolving<sup>(2)</sup>, forming alliances to accelerate data exfiltration and extortion. Together these trends define a threat environment where attackers are moving faster and with greater precision than ever before.

Traditional threat intelligence solutions often overwhelm teams with excessive data, requiring extensive manual analysis to extract relevant insights. Organizations need a smarter, more efficient approach to threat intelligence gathering and actioning—and that's where **Rapid7 Intelligence Hub** comes in.

### A New Era of Actionable Threat Intelligence

Rapid7 Intelligence Hub takes raw threat data and transforms it into curated, actionable threat intelligence, providing high-fidelity, contextualized insights to support the prioritization and response to real-world threats before they escalate.

Unlike traditional threat intelligence platforms (TIPs) that flood teams with alerts, Intelligence Hub cuts through the noise, surfacing only the most relevant threats based on active attacker campaigns, TTPs, and targeting by sector and geography.

Powered by intelligence from **Rapid7 Labs**, Rapid7's proprietary cybersecurity intelligence, threat data, and research organization, teams can easily focus on the most meaningful risk signals and take high priority actions (like undertaking remediation based on the TTPs deployed by threat actors) to stay ahead of critical threats most relevant to their organization.

<sup>(1)</sup> The Stack, A CVE explosion – and the lessons from it, Edward Targett, 05 January 2026

<sup>(2)</sup> Rapid7, Q3 2025 Threat Landscape: Speed, sophistication, and the shrinking window to respond, Rapid7 Labs, 12 November 2025

The final piece is operationalization, making curated threat intelligence usable in real time. Intelligence Hub is natively integrated into the Rapid7 Command Platform, feeding directly into analyst workflows to enrich alerts, deliver critical context, and surface attacker insights - ultimately simplifying and accelerating detection and response.

# Key Benefits and Capabilities Of Intelligence Hub

|  |   |
|--|---|
| <b>Proactively Respond to Real-World Threats</b>     | <ul style="list-style-type: none"><li>● Intelligence Hub aggregates and correlates threat data from multiple sources, ensuring teams focus on high-confidence threat indicators (IOCs, CVEs, TTPs).</li><li>● Curated, high-fidelity IOC feeds are infused with proprietary Rapid7 Labs research, honeypot data, and active threat monitoring to deliver the most reliable indicators of compromise, reducing false positives and increasing analyst efficiency.</li><li>● Monitor the most active adversaries targeting your industry or region to stay ahead of attackers.</li></ul>  |
| <b>Enhance Detection Coverage and Threat Hunting</b> | <ul style="list-style-type: none"><li>● Intelligence Hub feeds directly into Rapid7's AI-powered next-gen SIEM, Incident Command, providing context-rich threat intelligence to enhance detection, threat hunting, and incident response.</li><li>● Security analysts investigating alerts benefit from dependable attribution, with security events mapped against a curated intelligence library that shows related threat campaigns and curated profiles of threat actors to provide a real understanding of what and who is targeting your organization.</li><li>● IOC decay modeling automatically retires outdated or inactive indicators, reducing false positives and increasing detection precision within Incident Command.</li></ul> |
| <b>Prioritize remediation</b>                        | <ul style="list-style-type: none"><li>● Bridge the gap between threat intelligence and remediation for more effective security operations with real-world threat data. Curated CVE profiles provide the context needed for actionable, adversary-aware prioritization so you can focus remediation efforts where they'll have the greatest impact on risk reduction.</li><li>● Threat actor and campaign insights from Intelligence Hub's CVE profiles are integrated into Rapid7's Remediation Hub alongside AI-generated risk intelligence, helping security teams to prioritize the most impactful remediations.</li></ul>   |
| <b>Simplify Threat Reporting</b>                     | <ul style="list-style-type: none"><li>● Generate executive-ready reports that clearly communicate security risks, emerging threat trends, and remediation progress.</li></ul>   |

## Why Rapid7 Intelligence Hub?

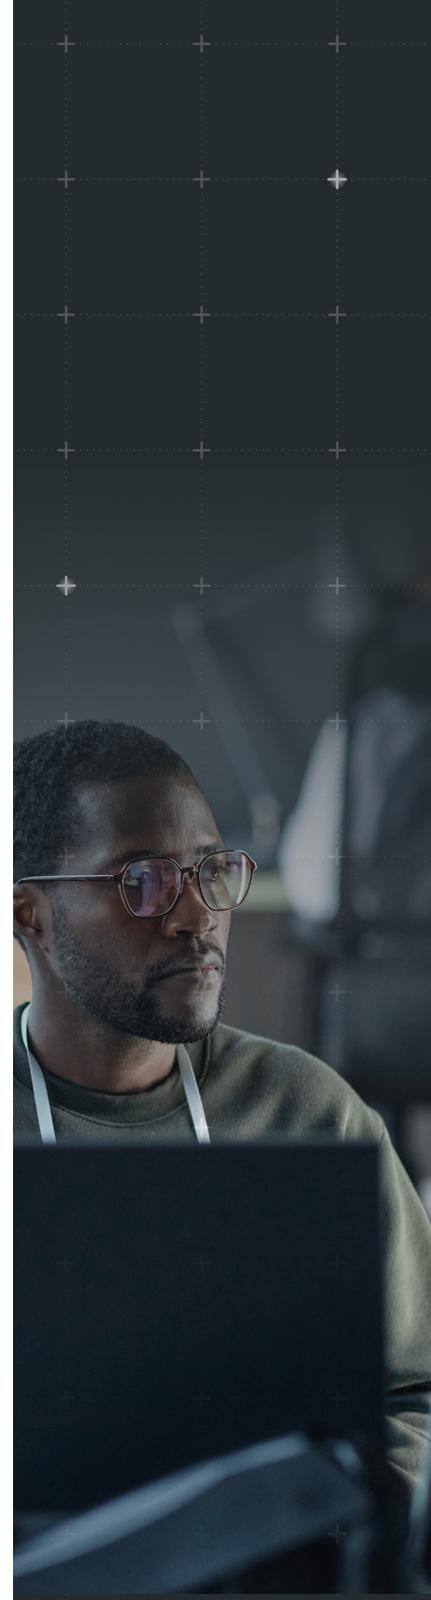

- **Intelligence, Not Overload** – Hone in on critical threats faster with high-fidelity, actionable intelligence, not just raw data.
- **Seamless Integrations Across the Rapid7 Command Platform**
  - Gone are the days of tab-hopping—accelerate response to critical threats with integrated intelligence across Rapid7 Exposure Management and Detection & Response solutions and services.
- **Real-Time Threat Context** – Get up-to-date intelligence on adversaries, their techniques, and active exploits.
- **Expert Curation** – Built on Rapid7 Labs' global proprietary research, open-source communities, and threat data, Intelligence Hub ensures high-fidelity, curated intelligence.
- **Adversary-aware prioritization** – Prioritize the highest-risk vulnerabilities with curated, threat-informed CVE profiles, expertly tailored by Rapid7 Labs.

## Ready to Stay Ahead of Adversaries?

Security teams need precision, not just information. With Rapid7 Intelligence Hub, your organization can cut through the noise, act on the threats that matter most, and build a proactive defense strategy in an era of escalating cyber risk.

### About Rapid7

Rapid7 is creating a more secure digital future for all by helping organizations strengthen their security programs in the face of accelerating digital transformation. Our portfolio of best-in-class solutions empowers security professionals to manage risk and eliminate threats across the entire threat landscape from apps to the cloud to traditional infrastructure to the dark web. We foster open-source communities and cutting-edge research—using these insights to optimize our products and arm the global security community with the latest in attacker methodology. Trusted by more than 11,000 customers worldwide, our industry-leading solutions and services help businesses stay ahead of attackers, ahead of the competition, and future-ready for what's next.
