

# Rapid7 Advisory Services

## Gain Security Resiliency

Overwhelmed. Understaffed.

Unprotected. Sound familiar? Then you'd probably also agree you lack the time and resources to assess your security program and uncover the insight you need to move it forward. The good news? You're not alone.

The better news: Rapid7 can help you not only get unstuck, but move with purpose. Our Advisory Services were designed with your realities in mind, built to help you prioritize your security initiatives, align them with your business, and get it all done yesterday.

How? It starts with our amazing consultants. Our global team of experts have decades of security, risk, and IT experience across different industry verticals and company sizes. In addition to their honed skills, our consultants have an innate drive to make security programs (your security program) relevant, actionable, and sustainable.

We combine these great people with our leading and technology, allowing us to provide you with assessment and development services that give you the concrete steps—and confidence—you need to bring your security program to the next level. Through a variety of threat-focused program offerings, our team can quickly assess what's working, what isn't, and what can be improved. We help you optimize, getting the most out of your existing security investments and maximizing the impact of your people, process, and technology.

In the end, you'll hold prioritized, actionable, and data-driven insight, with a step-by-step guide to strengthen your security posture. In other words, you'll gain security resiliency.

### THE RAPID7 DIFFERENCE

What makes our approach unique? Well, you do. We skip the one-size-fits-all solutions and apply our extensive expertise in cybersecurity and program development to create a customized program that's right for you and only you, and helps your organization to:

#### Leverage Expert Teams

You'll benefit from our strategic security experts, who have deep experience building and managing security programs, and expertise in vulnerability management, fraud detection, threat intelligence, incident response, and redteam programs.

#### Drive Executive Alignment

These same experts also make it easy to work with organizational leaders to select the appropriate tools and technology and build the collateral that helps them evangelize effective security controls to their broader organization.

#### Create Measurable Improvement

Our services drive measurable improvements and address both strategic and tactical aspects of improving security. We develop detailed documentation to help support your security program, including vendor- and tool-agnostic recommendations, prioritized execution roadmaps, and executive- and board-facing presentations.

---

## OUR ADVISORY SERVICES

### Cyber Security Maturity Assessment (CSMA)

#### Assess Current Conditions

We perform a thorough evaluation of the current state of controls and gain an understanding of the organizational risk appetite and business objectives.

#### Analyze Gaps

Industry best practices are compared to your organization's current controls and optimal changes are identified to build a relevant, actionable, and sustainable security program.

#### Align with Your Needs

Customized around your particular threats, risk appetite, and business goals, our program development engagements take a holistic view of your organization and the need to align with standards such as CIS Critical Security Controls, ISO, NIST, HIPAA, PCI DSS, and various maturity models.

### Cyber Security Foundational Assessment (CSFA)

Inspired by Rapid7's popular Cyber Security Maturity Assessment service (CSMA), CSFA is built specifically for the unique needs of smaller organizations. It deploys Rapid7 experts to help you define the fundamental parts of your security program, develop better "security situational awareness," and create a solid foundation for program development.

### Security Program Development

Whatever your organization's security needs—from creating vulnerability management programs to developing security policy and everything in-between—we'll help you build out process and collateral to run any facet of your security program. Our recommendations provide the foundation for a sustainable investment in people, processes, and technology, as well as measurable cybersecurity improvements in a time frame appropriate to your organization.

### vCISO

Our team has former security leaders from a variety of industries, and we apply their knowledge to provide you a virtual CISO (vCISO). Working directly with your team, no matter the size, your vCISO will help strategize, plan, and execute the cybersecurity strategy that aligns with your business strategy. With our guidance, your organization will realize the best routes to enable and support the business, while still dramatically reducing information security risk and inefficiency. Rapid7 vCISO services will provide a clear message of where your organization's security program stands, where it can go, and how to get there.

### Threat Modeling

This unique Rapid7 offering models threats in specific environments and at-risk business processes (payments, account management, B2B data exchanges, etc.) or specific IT environments (workstations, mobile devices, website, API, etc.), providing you the insight to:

- Focus effort on fixing the most important issues and understand potential attack scenarios for the system
- Identify forgotten or overlooked areas and improve focus by using realistic threats for threat agents you're most likely to face
- Learn the threat modeling state of mind yourself, with reusable models that can be kept up to date (workshop/training included)

## ADVISORY HOURS

Your advisory hours can be put toward whatever Rapid7 service(s) would be most helpful to your team or organization.
