

# Find Value Faster

### Natively Cloud

Our agile, adaptable SIEM was built in the cloud to get your team up and running quicker than ever before, while continuously up-leveling your capabilities as your needs and maturity evolve.

### Automatic Updates & Scale

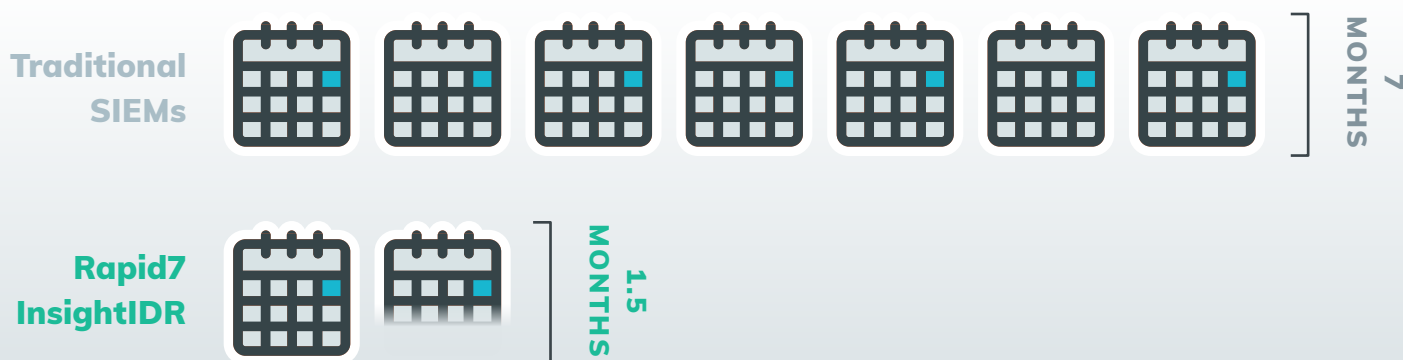

With InsightIDR, you benefit from automatic updates, detections, and new features. As a cloud-native SIEM, InsightIDR automatically scales to ingest, analyze, and return data to our customers based on load.

### Lightweight Collection

Our lightweight Insight Agent, Collectors, APIs, and Network Sensors ingest data from across your environment—including user activity, logs, cloud, endpoints, and network traffic—into a single solution.

## TIME TO VALUE

**InsightIDR customers see value in 1.5 months**

compared to an average of 7 months with customers' previous SIEMs

— The Forrester TEI of Rapid7 InsightIDR

<https://www.rapid7.com/insightidr-ROI>

Within a week we had more event sources and more data flowing in that we could have imagined. **We currently ingest more in three days than we did in three to four months previous in our traditional SIEM model.**

**Brett Deroche**  
Director of Security Operations

Rapid7's Insight Platform trusted by 7,900+ organizations & 120+ countries.
