

InsightOps Visual Search

Never type a search query again

When it comes to troubleshooting, knowing where to start isn't always easy. InsightOps Visual Search automatically visualizes top trends appearing in your data. Simply click to drill in and out of datasets and identify trends and anomalies related to an issue. As you click, Visual Search automatically builds search queries for you. Now you can complete an entire investigation without a single keystroke. With Visual Search, you'll never have to type a query again.

Surface anomalies

IT data is complex, but identifying the root cause of issues should not require extensive training or dedicated experts. InsightOps Visual Search does the hard work of identifying the important things requiring your attention. Exploring auto-generated visualizations assists you in understanding correlations across your data and allows you to easily drill down further for more granular detail.

Quickly filter data

Spending hours sifting through data doesn't work with your busy schedule. InsightOps Visual Search allows you to get to the subset of data needed for your investigation immediately. Instantly add and remove filters from your automatically generated query by interacting with the search terms in the query bar.

Painlessly create dashboards and reports

Aha! You found it. Visual search has aided you in traversing your IT data and now you have powerful visualizations you are ready to share with your team. Save your Visual Search to easily make new dashboards or create scheduled reports.
